

Avanti

Peace of Mind Security

Inkster Park Millwork Ltd.

presents The Avanti Door

Way System. A system that

provides enhanced family

security with Ektacron®

technology's maintenance-

free durability.

EKTACRON® FRAME SYSTEM

Trademarked Rigid-Loc® BOWTIE Miter System ensures perfectly set miters that keep everything square and true.

Cross-linking adhesives are green friendly for environmental concerns.

Internal strength of kiln dried premium grade lumber provides a solid wood core.

Ektacron® heavy gauge exterior vinyl (PVC), creates the ultimate in strength and durability.

Maintenance free Ektacron® surface never requires painting and is easy to clean.

No visible fasteners to avoid common corrosion concerns.

Superior design of composite structure minimizes the need for caulking.

Inkster Park Millwork Ltd. conforms to a rigorous set of guidelines to ensure quality. We carefully select our materials based on tight tolerances and exacting standards to ensure the pinnacle of craftsmanship. Each system is custom built to your individual requirements with our trademarked, maintenance free Ektacron® technology, providing the ultimate combination of strength and durability.

"We take pride in our doors so that you can take pride in your home."

- Gary Glowa, President
Inkster Park Millwork Ltd.

Avanti

Peace of Mind Security

Inkster Park Millwork Ltd. is a family owned business providing complete door systems for homes since 1966. We produce entrance, terrace and garden door systems, custom built to your needs. Our products are maintenance free to provide years of trouble free enjoyment and security.

The Avanti Doorway System offers your family peace of mind by combining the benefits of strength in a fiberglass door with the added security features provided by Inkster Park Millwork Ltd. Door panels are beefed up with an extra wide wood stile on the lock side for added reinforcement. Our multi-point stainless steel locking mechanism secures the door, while the stainless steel "spine" provides you with that extra measure of security.

Fiberglass doors come in an Ice White finish with additional colour options available through your dealer. Attractive deep, crisp embossed mould designs with glass options, heavy duty ball bearing hinges, handle options, along with an outstanding warranty combine to provide an impressive compliment to your home.

All visible frame surfaces are covered with the trademarked Ektacron® technology; heavy gauge, exterior PVC, which is cross-link bonded with green friendly adhesives to a kiln dried wood core. Mitered corners are held secure and square with the trademarked Rigid-Loc® Bowtie. No exposed fasteners, ensures a smooth look and a truly maintenance free finish. The composite structure expands and contracts in unison with temperature changes resulting in a stable surface able to handle the harshest heat or most dreadful cold. The stable surface also minimizes the need for caulking, providing a more professionally finished product.

EKTACRON® TEMPERATURE TESTS

Monitored testing has shown Ektacron® to hold it's shape and structure even under the most extreme conditions.

Cold temperatures below -43°C / -45°F

Multi-point stainless steel security locking mechanism for family piece of mind.

The Avanti uses an extra wide stile on the lock side for added security and protection, in comparison to a standard door.

FIBERGLASS DOORS

- Attractive and durable
- Ice White finish
- Additional colours available through your dealer
- Easy to clean
- Distinctive glass (optional)
