

## GARDEN DOORS

The IPM Garden Door unit features outswing doors to maximize useable floor space in the home. Both doors are hinged on the outside jambs; one door is used for entry / exit, and the other door is fitted with crank-out hardware and a fixed screen for ventilation. Two cam locks are installed on each door to ensure a weather tight seal in all conditions.

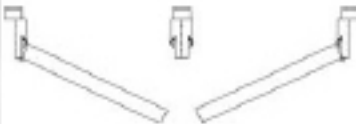

## CENTRE-HINGED TERRACE DOOR

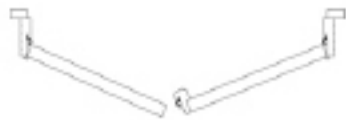

Centre-Hinged Inswing Terrace Door units feature double doors with a sliding screen; one door is hinged at the centre mullion and swings in, the other door is fixed. Hinging at the centre allows for more usable room space as the active door swings around against the fixed door.

## DOUBLE DOORS

Double Doors hinged on jambs with **solid fixed centre mullion**: Includes laminated mullion mortised into pocket in one-piece sill and one piece header.

Double Doors (inswing) hinged on jambs with **astragal** on one door, complete with premium grade flush bolts, **one piece** header and sill.

## SIDELITES

- 1) Fixed sidelites are available in a wide range of widths and heights

- 2) The **Venting Sidelite** comes with a full length panel that cranks out with a fixed screen on the inside. This option is available for all styles except #38 and #48. The venting sidelite panels come in 14" widths only and are not available in heights in excess of 6'-8".
